A shared place to write

Project overview

Writer brings familiar document tools to LopeOS. Select a passage, apply a style, and keep every idea in its place.

A practical approach

A document is more than its visible text. It carries structure, comments, revisions, and a page layout that should survive every save.

The next chapter

This paragraph starts on the second page. Editing across pages must preserve a continuous selection and coherent undo history.

Final notes

Unicode round trip: café, naïve, Ελληνικά, العربية, 日本語, and 🤦🏽‍♀️.
